RESEARCHERS
SPOTTED ANY UFO's LATELY
THERE'S A COVEY OF THEM DOWN AT FOXBORO !

Un-Foreseen Opportunities abound these days at The Foxboro Company . . . the fastest growing industrial instrument manufacturer in the business. We've listed only a few of our many UFO's. They all require an advanced degree for: physical chemists, analytical chemists, and chemical engineers.

PHYSICAL ANALYTICAL CHEMIST

Analytical instrumentation research and development. We need a man with a strong academic background, PhD or equivalent, to help exploit unique physical chemical properties of petrochemicals and plastics into new chemical analyzers.

You define the position. Your responsibilities should point toward leadership of an expanding research exploratory group charged with feasibility investigations of new analytical concepts. You will associate with a team of analytical chemists and development engineers and will have full opportunity for individual contribution at all stages from exploratory experiments to prototype instruments. This is a career opportunity in a growing research center with a company specializing in the development and manufacture of instruments for control of industrial processes in the chemical, petroleum, paper, power, food and other industries.

INSTRUMENTAL ANALYTICAL CHEMIST

Our Research Center has an unusual position for a BS/MS analytical chemist with a flair for development of instrumental methods. Two to ten years experience in instrumental analytical chemistry—should include both development and application of gas chromatographic techniques. Familiarity with optical and electrical measurements is desirable.

Will work with other analytical chemists and engineers on the development of new process analyzers. Will have freedom to pursue own ideas in a research environment with full opportunity for individual contribution at all stages from exploratory experiments to prototype instruments and field investigations.

This is a career opportunity in a growing research center in a company specializing in the development and manufacture of instruments and systems for control of industrial processes in chemical, petroleum, paper, power, food and other industries.

CHEMICAL SYSTEMS RESEARCH

In a new research group being formed, a unique opening for a chemical engineer with an MS (minimum) and some experience in process operation or design or in the application of control to industrial processes. Opportunity to apply new system and control theories on a variety of production processes in customer's plants.

Help analyze specific processes and with the guidance of technical groups within the company, participated in process system studies and development projects with customers to relate new control technology to specific processes. Develop and document process systems functional requirements. Provide process information to product design groups.

Through contacts with other company departments and customers, will keep aware of customer's control system requirements and new processing methods.

Interested in growing with us? Just send your inquiry to Professional Staffing, Central Recruiting Office, The Foxboro Company, Dept. 1215, Neponset Avenue, Foxboro, Massachusetts, 02035. We'll keep it confidential and you'll get an answer immediately.

FOXBORO®
Specialists in Process and Energy Control
An Equal Opportunity Employer

PROCESS CONTROL

Expanding Utah engineering department seeking young engineer with B.S. degree and broad, rather than specialized, interest in instrument and process control technology. Opportunity to join fast-growing effort within established mining firm and to participate in non-routine engineering development covering wide variety of operations. In addition, successful applicant will join advisory team of Research and Development staff in areas associated with electrical, electronic and instrumentation problems.

Salary open with liberal company benefits. Send confidential resume and pertinent personal, education and experience data to:

KENNECOTT COPPER CORPORATION
Western Mining Divisions
Engineering Department
1515 Mineral Square
Salt Lake City, Utah 84111

Attn: S. D. Michaelson, Chief Engineer

"An Equal Opportunity Employer"

INSTRUMENT ENGINEERS
LOS ANGELES

Graduate chemical engineers interested in the application engineering of complete control systems. Require a minimum of 5 years experience in petroleum, chemical plant or related fields instrumentation.

We also have openings for COMPUTER INSTRUMENT ENGINEERS who have an additional 2 years' process computer application experience.

Airmail confidential resume to:
Frank Leach, Dept. 115

FLUOR CORP.
International Engineers-Constructors
2500 So. Atlantic Blvd.
Los Angeles, Calif. 90022

Another In A Series On The Senses

ENGINEERS

Go Where the Future Responds to the TOUCH!

All five senses play a part in choosing the **right** place to find your career. If you have the **touch** for doing the right thing at the right time, you'll find plenty of room to exercise your "touch" at SCOTT. Scott exists on new ideas, new approaches. These can only come from people. If you're qualified to be one of our people, then you'll find that the future responds to your touch at Scott.

We seek the imaginative, we welcome the creative. That policy has already caused us to burst from our seams here at home; now we have affiliates in 13 foreign countries, with 18 plants humming busily in our overseas operation. On top of that, we export SCOTT products to 84 nations. It's evident that the "touch" is working.

If your five senses tell you that Scott "is" right for you . . . use your sixth sense, too — the one that tells you the other five are on target.

SYSTEMS · INSTRUMENTATION
PROCESS ENGINEERS

Plans to expand our efforts in automation of our Production Facilities have created the following challenging opportunities at our Philadelphia Engineering & Research Center.

SENIOR PROCESS ANALYST — MS or PhD in ChE. 2-5 years' thesis or industrial experience in digital simulation or control . . . **PROCESS ENGINEER** — BS or MS in ChE or ME. Experience in process analysis, design, or improvements. Digital computer experience desired . . . **INSTRUMENT ENGINEER** — BS or MS in EE or ME 1-5 years' experience in evaluation, selection and installation of process instruments, pneumatic and electronic . . . **SYSTEMS ENGINEER** — MS or equivalent in EE or ME 1-5 years' experience in use of systems concepts. Work to involve use of systems approach to design and improvement of manufacturing facilities . . .

SALARIES INDIVIDUALLY DETERMINED ON BASIS OF BACKGROUND AND EXPERIENCE.

Send complete resume to Mr. H. L. Swan, Technical Employment Manager, Dept. 6619, Scott Paper Company, Phila., Pa. 19113.

SCOTT PAPER COMPANY

An Equal Opportunity Employer — A Plans For Progress Company

DENVER
OPPORTUNITIES

FOR

INSTRUMENTATION ENGINEERS

Must have 5-10 years experience in process control instrument application. Some start up and maintenance experience desirable. Degree in ME, EE or ChE preferred.

Must be capable of writing detailed instrumentation specifications, evaluating suppliers quotations and make recommendations on instrument selection. Work includes complete instrumentation of oil, gas, petrochemical and metallurgical processing plants.

Denver offers you metropolitan educational, social and cultural advantages, unlimited recreational and sporting activities . . . AND more important the opportunity to build a career with one of the most competent and respected engineering firms.

Send resume in confidence to Director of Personnel.

Stearns-Roger
CORPORATION
660 Bannock, Box 5888, Denver, Colo.
ENGINEERS FOR INDUSTRY SINCE 1885
An equal opportunity employer

Assistant Sales Administrator Paper Machine Instrumentation And Control

Excellent career opportunity in growing field of electronic measurement and control systems. If you have a working knowledge of the paper industry and understand the fundamentals of instrumentation, we can offer great potential at our suburban Toronto plant. Sales and strategy, administration, market planning, and high-level sales participation will be your prime responsibilities.

Outstanding salary potential based upon experience and a generous offering of company paid fringe benefits can be yours. Send complete resume. If you have the qualifications, a local interview will be arranged. Address reply to Mr. Bruce W. Smith, Vice-President—Marketing,

Electronic Automation Systems, Inc.,

2957 Alt Blvd., Grand Island, New York 14072.
